

A critical element to VIA's vision of constructing a critical intellectual framework for visualisation in archaeology, the Academic Resource has been established as a one-stop, web-based forum for the circulation of research details and bibliographic information on vision and visuality-related studies.

The Resource is intended as a community-building tool whose components work together to foster conceptual reflection within archaeology, as well as to create a network of dialogue and information-sharing across disciplines.

VISUALISATION IN ARCHAEOLOGY:

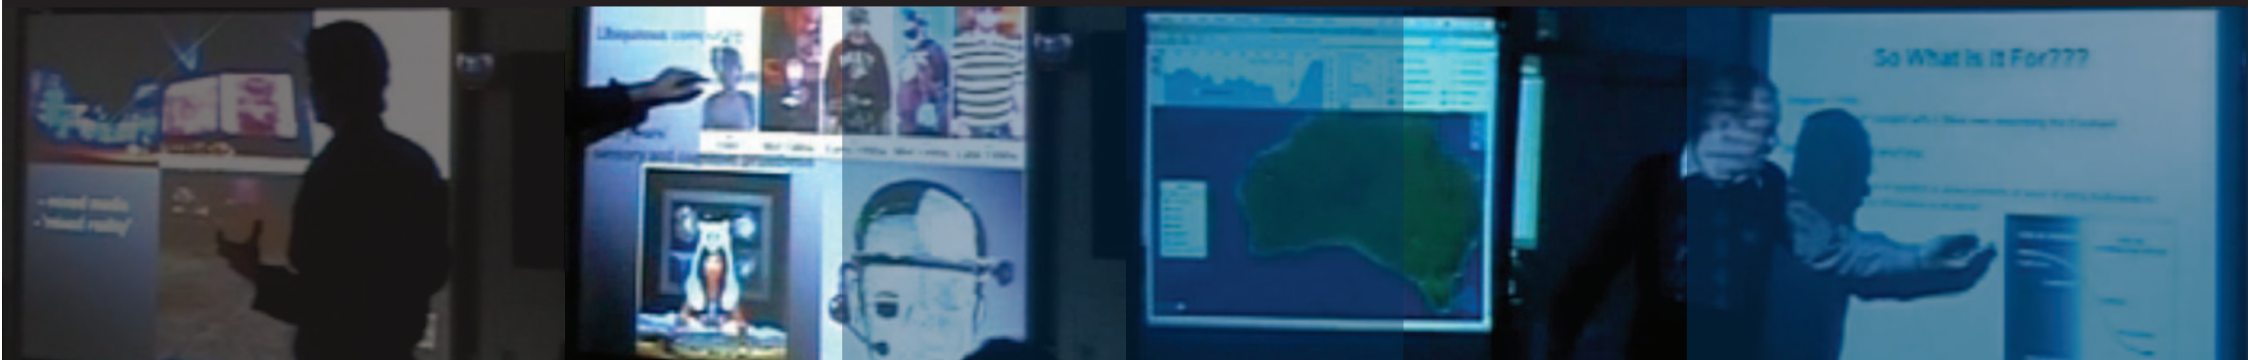

CALL

FOR

CONTRIBUTIONS

TO

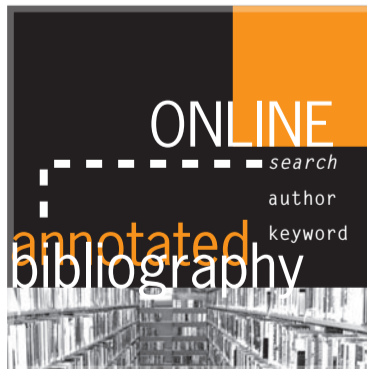

ACADEMIC RESOURCE

The Academic Resource will continue to develop over the next three years in line with contributions and input from the community. To add bibliographic references to the online bibliography or to feature your own work within the research showcase, please contact Sara Perry at: [sara.perry@viarch.org.uk](mailto:sara.perry@viarch.org.uk)

The **bibliography** and **research showcase** seeks to connect users with cross-disciplinary literature, enabling archaeologists and others to learn from and build upon the visualisation-oriented writings of practitioners from a variety of fields –

- arts**
- sciences**
- humanities**
- social sciences**
